

ADVANCED CONTRACTS COURSE: CIVIL CONSTRUCTION

This half day advanced contracts workshop, presented by Holding Redlich lawyers, is designed to provide practical advice and tips on the administration and management of construction contracts, while outlining the common traps and pitfalls for contractors. This course will have a very practical focus and will use case studies from real life. It is aimed at experienced managers of contracts who want to gain a more in-depth knowledge of the legal background to contracts and claims, and how to better protect their businesses.

STATEMENT OF ATTENDANCE

- Advanced contracts course – civil construction

COURSE CONTENT

- Evaluating and managing key risk factors in civil works contracts
- Examining key risk management tools, such as indemnities, warranties and insurances, and how they work together
- Focus on limitations and exclusions of liability, how they work and what they really mean
- Getting paid – tips and traps (BCIPA and QBCC)
- In-depth analysis of some common areas of dispute, such as extensions of time, liquidated damages and variations
- Practical contract management tips (and traps), how to protect yourself and how to head off problems
